## Interpon D Textura

# Bringing color and style to the surface

With its refined, textured finish, and extensive range of colors, it is no surprise that the Textura range of Interpon D powder coatings has become the first choice for architects and designers looking for cost-effective style and performance for the projects and features they imagine.

Offering a choice of over 100 colors in our Ready to Ship (RTS) range, architects can be assured that their creations are always on-trend, while the textured finish gives aluminum and steel surfaces an intriguing sense of quality and depth, with significantly higher gloss retention and resistance to color change.

Protecting surfaces in milder climates, the Interpon D1036 Textura range has excellent weatherability enabling your projects and reputation to stand the test of time at a price that's affordable. As a powder coating it's also more sustainable, with a reduced cleaning cycle, so that less water and fewer chemicals are needed to keep surfaces looking fabulous all year-round.

The Interpon D1036 Textura range is perfect for coating fences, railings, pergolas and gates.

## Transparency and reliability

### You can rely on us

Our Interpon D1036 Textura range delivers on its promised durability levels in terms of color retention and film integrity.

- Comes with a 15-year warranty for the D1036 series on the coating performance, when applied by an Interpon D Approved Applicator.
- Qualicoat Class 1 and GSB Standard certifications.

### Building a sustainable future

Interpon D1036 Textura is one of a family of products that is not just helping us to imagine the future it is also protecting it. Backed by an Environmental Product Declaration (EPD), the raw materials, manufacture and transportation associated with creating Interpon D have been assessed by an independent third-party for transparent sustainability credentials.
